The **Review & Certification Fee**, as listed on this Fee Schedule, includes SCSCD costs from the time a completed application, proper fee and a Soil Erosion & Sediment Control Plan is submitted to SCSCD until that time that the plan is Certified by SCSCD. Following expiration of the original 3 1/2 year certification period all projects are subject to a Re-certification fee. \$25.00 of the Review and Certification fee represents a uniform statewide per application surcharge established by the State Soil Conservation Committee on Chapter 251 applications submitted to a New Jersey Soil Conservation District. The fee will be used by the State Soil Conservation Committee to support program administration and is effective April 15, 2010.

The **Inspection / Compliance Fee**, as listed on this Fee Schedule, includes the SCSCD inspection costs from the time that the Soil Erosion & Sediment Control Plan is Certified by SCSCD until the time that a Final Report of Compliance is issued for the project. Additional fees may be incurred if the project does not remain in compliance to the Certified plan (refer to Section 1.). In all cases, following expiration of the original 3 1/2 year certification period, plans must be Re-certified and are subject to all applicable fees.

*In calculating the Inspection/Compliance fee for categories B, C and E, the actual area of disturbance in acres is rounded up to the next whole number. Approved by the SCSCD Board of Supervisors on 12/7/2011 and by the SSCC on 11/14/2011, effective on 1/1/2012.
